

Rainbow Maker!

How it works:

You will need scissors, a tack or pin, a pencil or marker, and a piece of corrugated cardboard for a drawing surface, and a piece of paper.

Cut out the central strip of paper. Poke holes for the pencil or marker on the black dots.

Place your drawing paper on the corrugated cardboard, and pin the rainbow strip to a single spot, so that you can rotate the strip around the pin or tack.

Carefully place your pencil or marker through the first hole in the strip, and rotate the pencil in a circle on your paper.

Rainbows always appear with the colors in the order show: starting at the top, red, orange, yellow, green, blue, and purple.

Make sure you put the correct color between the lines of your rainbow!
